

Veenix® ChromaTunes

Introduction

ChromaTunes® is a smart and easy-to-use music player that organizes music by HPE (Human Perceptual Energy) and an associative color. This new technology allows you to hear exactly what you're in the mood to hear with one simple click. Need some exercise music? Click the red, pink or purple button. Ready to go to sleep? Click the dark blue or light blue button. Need some uplifting music? Click the yellow button. Need to chill? Try the green button. ChromaTunes makes it that simple!

ChromaTunes also features **Smart-More®**, which allows you to instantly find and hear similar tunes in your music collection. Simply select a tune and click the Smart-More button in the player controls area (or select it from the Playlist menu), and a playlist of similar tunes is instantly created and begins playing.

ChromaTunes supports MP3/ACC files. DRM protected files are not supported.

2 Easy Steps To Enjoying ChromaTunes

1. Launch ChromaTunes. A dialog window will appear asking if you'd like to add the tunes in your music folder. Click yes/okay and ChromaTunes begins analyzing and adding tunes to your library. (Note: ChromaTunes never moves or copies your actual music files. It simply stores a reference to where the files are located.)
2. After adding your tunes, click one of the color buttons in the lower right of the window or select a tune and click the Smart-More button. That's it!

System Requirements

Computer: Macintosh

System: 10.4, 10.5, 10.6 or higher

Architecture: Universal Binary for Intel and PPC processors

Button Reference

Menu Reference

File Menu

• Add Tunes To Library...

Use this feature to add tunes to your library. The standard file dialog appears and you may select any folder or entire volume to scan for music files. (Please note: ChromaTunes never moves or copies your actual music files. It simply stores a reference to where the files are located.) ChromaTunes supports **MP3/AAC** files. DRM protected files are not supported. (**Note: You can not add tunes during playback.**)

• Add Tunes From Music Folder

Use this feature to automatically add tunes to your library from your Music folder. (Please note: ChromaTunes never moves or copies your actual music files. It simply stores a reference to where the files are located.) ChromaTunes supports **MP3/AAC** files. DRM protected files are not supported. (**Note: You can not add tunes during playback.**)

• Flush ChromaTunes Library

Use this feature to remove all the tune references from library database.

• Reveal selected Tune In The Finder

Use this feature to locate a physical tune file in the Finder.

• Send Selected Playlist to iTunes

Use this feature to create a playlist in iTunes. A dialog window will appear asking you to name your playlist and enter the number of available tunes to include. (Note: You can not use this feature during playback.)

Playlists Menu

- **All Tunes**

Use this feature to see a list of all the tunes in your library. Selecting this playlist does not cause immediate playback.

- **Last Added**

Use this feature to see a list of the last tunes that were added to your library. Selecting this playlist does not cause immediate playback.

- **More From This Artist**

Use this feature to create an instant playlist of all tunes by the selected or currently playing artist. Selecting this playlist causes immediate playback.

- **More From This Album**

Use this feature to create an instant playlist of all tunes in the selected or currently playing album. Selecting this playlist causes immediate playback.

- **More From This Genre**

Use this feature to create an instant playlist of all tunes in the selected or currently playing genre. Selecting this playlist causes immediate playback.

- **More From Smart-Plays**

Use this feature to create an instant playlist of all the tunes you have previously selected using Smart-More. (This is a quick way to hear all your favorite tunes.) Selecting this playlist causes immediate playback.

- **Smart-More Like This Tune**

Use this feature to create an instant playlist of tunes similar to the selected or currently playing tune. Selecting this playlist causes immediate playback.

- **Surprise Me**

Use this feature to create an instant playlist of a randomly selected tune and all tunes similar to it. Selecting this playlist causes immediate playback.

- **Energy Mix**

Use this feature, and submenu, to create an instant playlist of tunes by energy-color. (This menu item does the same thing as the color buttons in the bottom right of the window.) Selecting this playlist causes immediate playback.

Edit Menu

- **Clear Smart-Plays**

Use this feature to reset your Smart More Like This Tune plays.

- **Set Genre For This Artist**

Use this feature (and submenu) to select a genre for the selected artist. All tunes for the given artist will be set to the selected genre, except tunes listed as Holiday or Soundtrack.
