

Part 4: Magical Meta

Meta Mini Popovers

11/21 → 6/4

!

My nifty task

Hold down the Option key and click the checkbox in the task above. Ta da! A mini popover so you can quickly set a specific percent complete.

There’s more! Option-click the date control to set the date information. Option-click the flag to quickly set tags and flags. Plus Curio supports keyboard shortcuts to bring up these same popovers.

These mini popovers are pretty smart. While a popover is up, if you click on another figure then the popover zips over to that figure to show you its info. If you click on the idea space background then the popover automatically closes itself. You can also close the popover by hitting the Escape key.

Popover	Using the mouse	Keyboard shortcut
Tags	Option-click existing tag adornment	, (the comma) hint: think of a comma-separated list of tags
Percent Complete	Option-click existing checkmark adornment	. (the period) hint: think of a long line of dots indicating progress being made
Dates	Option-click existing date adornment	/ (the forward slash) hint: think of a slash used in a date such as 12/25/2013
