Folder Cloak V1.0

Author: Asa Margetts
Freeware Software, 2012

Quick Start Guide

Introduction:-
This is a security application which will hide the myfolder folder and it's contents. It doesn't use the built-in Windows hide attribute which can easily be found, it uses a different method!

How to use:-
- Store your private files in the myfolder folder.
- When you're ready to cloak (hide) myfolder and its contents:-
    - 1) Run the FolderCloak.exe application
    - 2) Type the default password which is password (this can be changed)
    - 3) Click the Cloak Folder button
    - 4) The folder is now completely cloaked!!
- Clicking the Uncloak Folder button will make it re-appear!
- You can change your password by clicking on the Change Password button

Requirements:-
- Tested on Windows XP and 7
- .net framework 3.0 or above
- Full administrator access to the PC
- The myfolder folder must be in the same location as the FolderCloak executable and the components folder.

License:-
This software is Freeware so can be distributed and used at your own risk free of charge. As always, make sure you keep a backup of your files.
