

Read Me!

MovieBriefs creates an image contact sheet from your movies by extracting up to 400 images (at equally-spaced intervals within your video) and displaying them onscreen in a grid. You select the portion of your movie to use and MovieBriefs does the rest.

System Requirements

This software works best with OS X 10.10 (Yosemite) or later.

Installation

1. Double-click the archive file you have downloaded, MovieBriefs141.zip. Open a Finder window for the MovieBriefs141 folder, which will contain the application, along with several other documents.
2. Read the MovieBriefs License Agreement and MovieBriefs Quick Start Guide.
3. Drag the MovieBriefs icons to the Applications folder on your disk drive. Double-Click the icon to launch the programs.

Purchase and Registration

Until purchased and registered, the software will function as a time-limited demo. The expiration date can be found on the Registration Panel.

Once the software expires you will no longer have unlimited access to the software's full functional capabilities. To purchase a license, visit our website at <http://www.einsteinslegacy.com> and click the "Store" link in the top right corner.

Finding More Information

While using this software, you may open the User Guide by choosing **MovieBriefs Help** (Cmd-?) from the Help menu.
