

## Installation Instruction

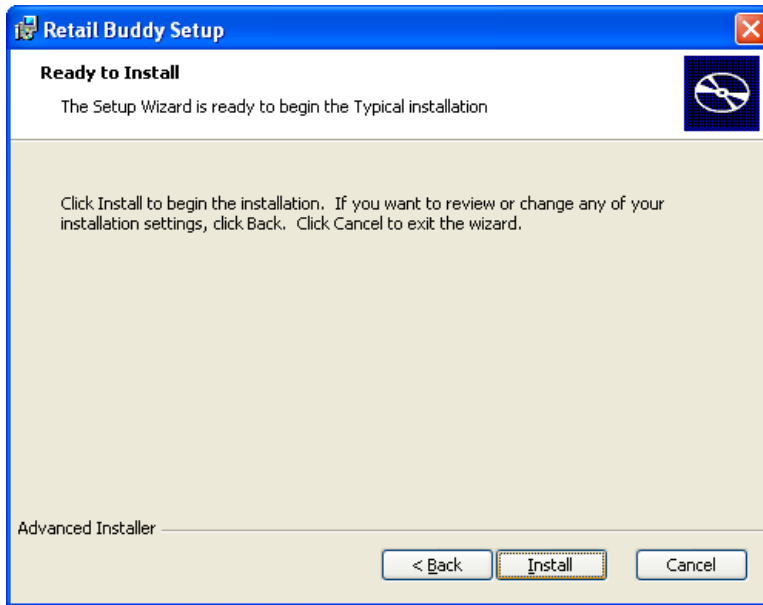

1. Double click Setup.msi file. It will show the form as shown below. Now click next to proceed with installation.

2. Choose the Installation location by clicking the Browse button shown in the form. It is advised that you continue with the default location.

3. Once you select the installation location, Click Install button on the form which is shown below. Now all the files will be installed to the location specified.

4. After some time once all the files are copied following screen will appear which denotes that Retail buddy installation is successfully completed. Click finish to finish the installation.

Now you are ready to work with the software.
