

For authenticity, YourStamp™ stamps can be made in two styles. These are: 'bleed', in which the image you have chosen is applied all over the stamp, bleeding right across the perforations and giving a contemporary feel; and 'white border', in which the image is contained in a rectangular area surrounded by a narrow white frame which runs to the perforations.

Choosing the style of your stamp

To create a stamp on which the image bleeds across the perforations (no white border) click the 'STAMP WITH BLEED PICTURE' radio button.

To create a stamp with a white border around the picture, running to the perforations, click the 'STAMP WITH WHITE BORDER' radio button.

Previewing the stamp style

Click PREVIEW to apply your choice of stamp style to the image in the Preview Window.

Click BACK to return to Step 1, Click NEXT to move on to the final Step, or Click CANCEL to begin again.
